

642 INOX

for beams up to 7 m

■ Beam

■ Self-supporting barrier body

■ Fast and versatile

For beams of up to 4 metres, the "rapid" version of the FAAC 642/40 offers the continuity solution to the traffic problem, by enabling uninterrupted use frequency. The "Standard" version is suitable for lighter traffic, and can be equipped with a skirt to prevent break-ins.

■ The right solution for large industrial accesses

With its length of 4 to 7 metres, the FAAC 642/70 range is ideal for traffic-control in large industrial accesses, with particularly demanding use. On top of that, the stainless-steel version ensures resistance against any environmental aggression and reliability in line with the severest demands.

■ High-tech

SMT microprocessor electronic technology is supplied standard to ensure exceptional performance.

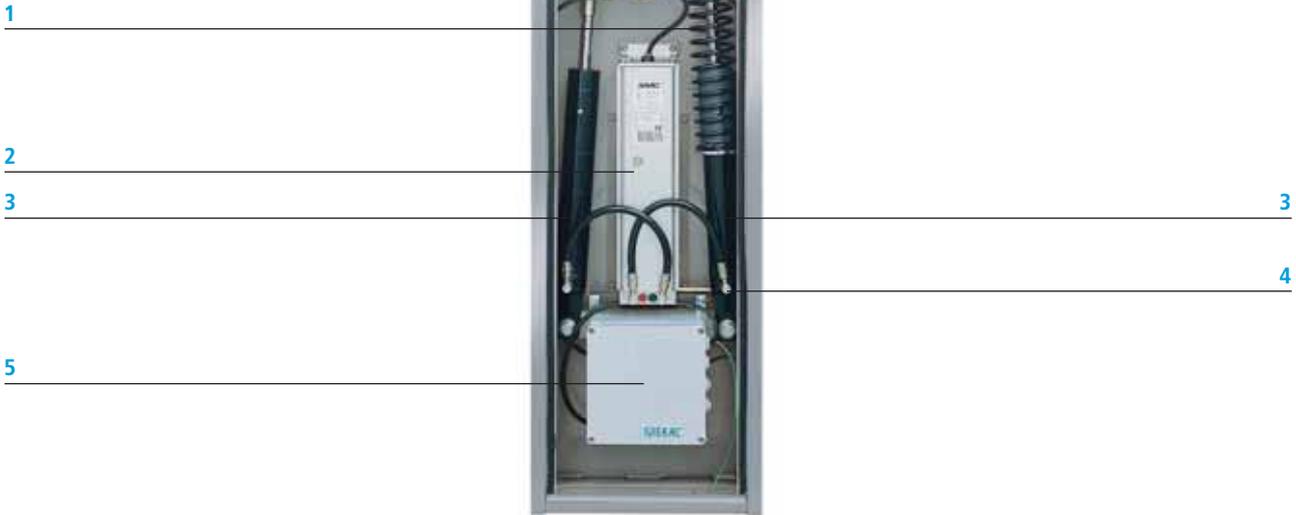

By means of an optional card, the barrier can also control auxiliary services and an additional opposing beam. Barrier statuses can be signalled to traffic control devices.

■ Precise stopping

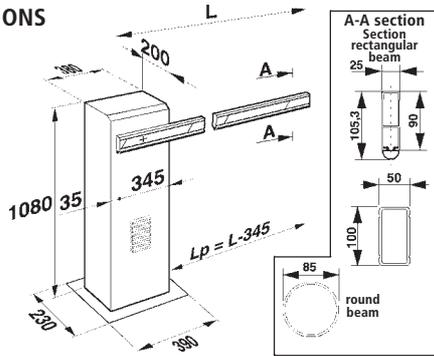

Perfectly calibrated stopping thanks to the adjustable electronic brake that slows down closing and opening movement. A thermal probe detects temperature and activates a cooling fan.
